DOOSAN
Škoda Power

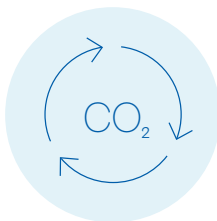

Power equipment manufacturer, engineering solutions provider

Doosan Škoda Power is one of the leading steam turbine manufacturers providing engineering, design, manufacturing, management, procurement and installation of steam turbines and equipment relevant to turbine machine halls with power output from 3 to 1300 MW. The Company offers its products, services, long-term service contracts and retrofits worldwide for various energy and industrial sectors.

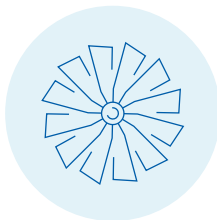

Traditional Energetics

- Biomass Combustion
- Combined Heat and Power
- Nuclear
- Renewables (CSP)
- Waste Incinerators
- Combined Cycles

New Trends

- SMR – Small Modular Reactors
- WHR – Waste Heat Recovery
- CO₂ Cycles
- ORC – Organic Rankine Cycle
- Energy Storage

Turbine Service

- Repairs, Spare Parts
- Overhauls, Inspections
- Retrofits & Upgrades
- Engineering and Technical Consultancy
- Long Term Service Contracts

Global supplier of modern technologies, components and services

Founded in 1869, the company specializes in the design and manufacture of high-efficiency steam turbines, including comprehensive maintenance services and advanced diagnostic tools to ensure optimal performance.

Since 2009, we have been a proud part of the Doosan Group, one of the ten largest conglomerates in Korea, with over 120 years of experience in fields of engineering and manufacturing of power plants, construction equipment, industrial facilities, engines and in construction industry.
